Guth Pump Registry User Guide

Roles and Responsibilities

Pump Originator: Create new pump records with model, configuration, and customer details.

Stores: Pull parts from the BOM for assembly.

Assembler: Verify BOM items as assembled.

Testing: Test pumps, record results, and generate certificates.

Admin: Manage users, view pump status, and export data.

Usage

1. Login with your credentials.
2. Use the sidebar buttons based on your role.
3. Admins can export data and manage users from the Admin Panel.
